About me

Full Stack Engineer with 10+ years of experience building and modernizing web and mobile products with Python, FastAPI, Node.js and React. I've worked autonomously in small teams and inside large organizations, both remotely and on-site, including over four years abroad. Pragmatic and collaborative, I care about clean architecture, testing and shipping reliable software.

Interests

I'm always interested in a good collaboration with talented people to improve efficiency and lead or enhance the Software Development process for organizations and products that make life easier.

I'm also very passionate about music, science, finance, and languages. My favorite instrument is the drums.

Experience

Full Stack Engineer

Jun 2024 – Present | USA, Remote

Majestyk Apps

- Worked autonomously in a small team, taking client projects from design to production with minimal supervision.
- Designed and implemented backend services, CI/CD pipelines, unit tests and database solutions for clients across the globe.
- Embedded in a large client's ~30-developer organization (four sub-teams) to remove legacy code across nearly the entire frontend and part of the backend.
- Implementing AI-assisted agentic workflows.

Tech: Python, FastAPI, Node.js, React, Javascript, Typescript, CI/CD, Docker, AWS, DynamoDB, LangGraph, LangChain, RAGs

---

Full Stack Engineer

Jan 2020 – Jun 2024 | USA, Remote

Foxbox Digital

- Implemented Clean Architecture across multiple projects.
- Designed and implemented Unit and UI testing strategies, improving code reliability and maintainability.
- Implemented internal and external projects tooling.
- Worked in small and large cross-functional Agile teams, collaborating closely with Design, Product, and QA.

Tech: Python, FastAPI, Node.js, React, Javascript, Typescript, CI/CD, Docker, GCP, Firebase

---

Full Stack Engineer

Aug 2015 – Dec 2019 | Sweden, On-Site

DYNAMO Consulting

- Collaborated with small and large multicultural teams from Design, Product, DevOps, QA and even Management.
- Implemented features across several small and large projects.
- Integrated and deployed products with Continuous Delivery pipelines.
- Collaborated with management with Agile practices implementation for small and big clients.

Tech: Python, Flask, Django, ReactNative, Javascript, AWS, CI/CD, Firebase

---
